

(A) One item's budget, spent three ways

(B) AVR: stop paying for tokens the answer no longer reads

PASS 1 — localise: whole image @300 tokens, every layer's attention kept

PASS 2 — answer: crop W=0.25 @300 tokens (1/16 area, 16x density)

(C) DWA on V*Bench direct_attributes/109 ("What is the color of the tablecloth?"): the same 600 tokens as the bar, spent on a magnifying glass. Bar answers $\bar{C}$ (wrong), block mean answers C (wrong), AVR answers C (wrong), DWA answers A, $p=0.999$ (correct).
